

Bells

Short bell - signals getting ready to leave and moving to next activity/lesson. Teaching should be completed by the time this short bell sounds; learning has ended.

Long bell - signals the start of the next activity/lesson. Students and teachers should have arrived at their next location, unpacked and be ready to learn by the long bell; learning has started.

Between short bell and long bell, the corridors will be busy with students moving between their lessons. When the long bell sounds, the corridors should be empty of students. Students arriving to a lesson late will be issued with an automatic C2 (10 minute detention with the class teacher).
